The Telephone Message Service in case of a disaster (171)

In case of a disaster, you can confirm the safety of people in disaster-hit areas by using this system provided by NTT.

Message recording: Dial 171J + 1J

Enter the telephone number of the person in a disaster area from area code.

Record a message within 30 seconds.

Message playback: Dial 171J + 2J

Enter the telephone number of the person in a disaster area from area code.

Playback a message

*For cell phones, PHS and non NTT lines, please contact your carrier regarding their services.

Disaster Prevention Check List for Families

You can start now!
[Earthquake Preparedness]

Kiryu City

In the wake of the Great East Japan Earthquake which occurred on March 11, 2012, we learned many valuable lessons. In order to reduce the impact of a future earthquake, we think the key is to make disaster preparedness part of our lives. So, we created this disaster prevention check list that will help our citizens prepare for an earthquake. Discuss, as a family, what to do in case of a disaster.

If an earthquake occurs...

Where should we evacuate?

How do we secure water and food?

Be careful of falling furniture.

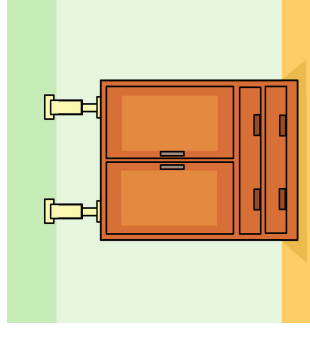

Let's have a family meeting!

Plan evacuation procedures.

Take necessary measures to prevent furniture from toppling or falling.

Check emergency supplies.

Hold family meetings for Disaster Prevention!

Emergency Checklists

For indoors

- Furniture is secured with brackets to prevent it from falling.
- Unstable furniture is not placed in bed rooms or rooms for children or elderly people.
- Heavy furniture or piano is not placed on the 2nd floor.
- Heavy objects are not placed on top of furniture.
- The escape way is not blocked by furniture or any objects.
- Shatterproof films are placed on the windows.
- Lighting equipments are secured to prevent it from falling.
- Heavy objects are stored at the bottom of storage furniture.
- Slippers, shoes and flashlights are readily available at home.
- Kitchen cabinets are secured to prevent the doors from opening unnecessarily.
- Fire alarms are installed.
- Fire extinguishers are readily available at home.

For outdoors

- If your house was built before 1981, quake-proof diagnosis and reinforcement need to be completed.
- Roof inspection and reinforcement are completed.
- Roof antenna and water heater are secured.
- Termite control is conducted periodically.
- Check if shutters appear loose.
- Hazardous falling objects such as plant pots are not placed on the balcony.
- Laundry poles are tightly secured.
- Propane gas cylinders and kerosene tanks are securely stored.
- Partitions on the balcony and evacuation exits are not blocked by objects (only in apartments or housing complexes).
- A meter with a microcomputer-based safety device is installed to prevent gas leakage.
- Brick and stone walls are reinforced.
- Identify hazardous areas in your neighborhood (Ex. narrow paths, cliffs and river sides).

Emergency items to take with you!

- Water (Change date:)
- Food (Change date:)
- Portable radio and spare batteries
- Flashlight, spare batteries and light bulbs
- Helmets and disaster prevention hood
- Whistle Household medicine
- Towels
- Medicine for injuries, band aid, fever reducer, and stomach medicine
- A copy of health insurance certificate and driver's license
- Valuables (bank account book and personal seal)
- Cash, change
- Candles, lighters (matches)
- knife, can opener, spoon, chopsticks
- Wet tissue
- Shoes suitable to evacuate
- Clothes Gloves
- Mask Sanitary items
- Writing tools

Store those items in an area you can easily access.

Family members should talk about the following points and their responsibilities during an earthquake.

Check emergency kit and items to be taken in case of an emergency.

- All necessary items are prepared.
- Check the condition and expiration dates of the items.
- Confirm with your family where emergency kits are stored.

Talk about each member's responsibility.

- daily and emergency responsibilities.
- Who will be responsible for evacuating babies and the elderly.

How to act in the event of an earthquake

- ① Seek safety of yourself first.
- ② Secure an escape exit.
- ③ Extinguishing fire.
- ④ Obtain correct information on the radio etc.
- ⑥ Confirm safety of your neighbors.
- ⑦ Evacuate on foot.

Confirm emergency contacts and location of emergency shelters

- Confirm how to contact each other if separated.
- Know escape routes and where to evacuate.
- Be aware of weather and disaster information at all times.
- Participate in disaster prevention drills in your community.

Special needs items
